DATE 2007

REMOVED PAPER

MEMORANDUM FOR: SR/DOB  
SUBJECT: Transportation Requirements for Externally Held Assets

1. The following information is furnished in accordance with telephone conversation [ ] [ ]
2. Current transportation space requirement tables provide for movement of 47 SR assets from CONUS to overseas marshalling areas. Upon arrival overseas, the assets come under ~~operational~~ control of COMCINAEUR for further employment into assigned target areas. Assets which have become available since January 1961 will be included on the 1962 review and picked up on transportation space requirements at that time.
3. SWPE has been informed of the following:
  - a. Necessary communications equipment will be carried by the individual.
  - b. Individual equipment to be carried TAT will consist of: suitable small arms and ammunition, survival equipment for prolonged behind-the-lines living, documentation, individual clothing, money and individual medical supplies. Cargo TAT will average approximately 125 pounds per man. Cargo TAT is defined as mission type equipment which is in addition to normal individual clothing and equipment.
4. SWPE has levied requirements for STOL sorties on EUCOM for movement of assets from overseas marshalling points to target areas. I am forwarding extracts from SWPE's STOL plane requirements in hopes they offer some assistance in developing your training program.
